

Your Vision Your Village

Social Networking Software
that puts You in control

WorldGroup 5.0

Industry-leading Social Networking Platform

Add social networking features to your company website or create a revenue-generating virtual e-community. You can offer your members a full menu of social features - chat rooms, discussion boards, shared document libraries, blogs, micro-blogs, profiles, calendars, photo galleries, video catalogs, auctions, classifieds, personals, polls, stores, databases, private community e-mail, facebook-like friend feeds, twitter-style updates, and much, much more.

Why Social Networking?

It's simple. To succeed in e-commerce, you need to succeed in e-community. Every site is fighting to attract and retain users. By adding our interactive social networking features, your site can grab their attention, keep them on the site, and encourage them to return.

Why us?

NetVillage's expertise and collaboration tools pre-dates even the web - we when built communities for dial-up services. We know what works, and what doesn't, in the social networking space. We are not a pablum-eating "Social Networking" provider birthed during the past year. We are, without a doubt, the most experienced web community provider around.

Give us a call and find out for yourself. 1-888-NETVILLAGE
